

Potassium water glass

Liquid potassium silicate

An aqueous solution for industrial formulations.
Manufactured in Stara Zagora, Bulgaria.

MODULUS 3.2-3.4

KEY APPLICATIONS

01 Paints & coatings

An inorganic binder for mineral paints and silicate coating systems.

02 Cleaning products

An alkaline component for detergents, degreasers and industrial cleaning formulations.

03 Construction materials

A component for silicate binders, construction mortars and coatings.

04 Refractory materials

A raw material for refractory compounds and inorganic composites.

**Modulus 3.2-3.4.
For industrial
formulations.**

Manufactured upon prior request.

Form	Liquid aqueous solution
Modulus	3.2-3.4
Parameters	To the agreed specification
Quality control	CoA for each batch

Store in tanks or tightly sealed containers at temperatures above 5°C. Shelf life: 3 years under these conditions.

Suitability is confirmed for the specific formulation. Technical data available on request.
